

To: **BEST Tyre Protection Sealant International**
Kind attention: **Mr. Anthony P. Fragatos**

Athens June 17,2009

Dear Anthony,

We are very pleased to write this letter not only recommending your product but also the professional service we have received since becoming a distributor.

Four years ago we started promoting BEST T.P.S. and we have seen incredible sales – we have increased our client base and the quantities purchased by each client has grown year on year. Our clients are clearly very pleased with the product as when their fleet increases they have immediately installed BEST T.P.S. almost without thinking.

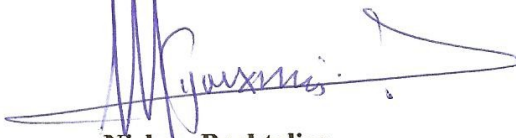

We have a good deal of experience in using and distributing other sealants in the past, but we have never experienced clients applying BEST in all their machines and then in their new purchases. Before our co-operation, we were promoting solutions for only protecting the tread area of the tyre. Today, because low cost tyres are in the market even for huge sizes, it is absolutely necessary to seal all the natural pores of rubber and fill the gaps between the rim and the tyre, as well as the tread area.

While other products make claims that we cannot prove, we know that BEST T.P.S. definitely seals the natural pores and fills the gaps between rim and tyre. These two values alone are unique in the market and highly valued by our clients.

All our clients are happy to buy the product and pay for the initial investment as they are saving large amounts, particularly in reducing the downtime of their machines.

We definitely recommend your product to any company which would like to become your agent or as a purchaser of the product not only because it is really the best in the market but also because we highly value the business relationship between our companies.

Very truly yours

Nickos Bachtalias
Chief Executive Officer
