To: Whom it may concern

Athens July 7, 2009

V.TSOKANI S.A. is one of the largest companies in mining, quarrying, and earthmoving industries in Europe. We operate and manage our own quarries but also offer our services to some of the most important companies in Greece and the Balkan territories, operating both in the public and private sector.

Two of our largest clients are the Greek National Electric Power generation company (operating with open coal mines in Ptolemais and Megalopoli) and ITALCEMENTI Group – HALYPS producing cement and crushed road gravel.

Our fleet of vehicles consists of:

- 26 Dumper trucks, capacity 100tn each,
- 6 Dumper Trucks, capacity 50tn each and
- 14 loaders Caterpillar 992 C, 992 G, and 992 K.

We need to ensure our fleet is operational at all times as a day off the road is a considerable loss of income. Next to fuel, the second largest running cost of our operation comes from tyres. We have tried many solutions in the market without any significant results. A year ago we started using BEST Tyre Protection Sealant because it was a new formulation and not another rebranded product. In the beginning we were very skeptical so we put the product to the test in our worse operating conditions. Although we made extensive testing, we saw quick results and we can assure that BEST T.P.S. is an excellent product, with a 100% success in:

- Sealing all pressure leakages from the o-ring of rim and tyre bead edge
- Stopping air leaks from the natural pores of rubber
- Sealing leaks around stones and steel bars lodged in the tyre
- Sealing leaks from the air valve

All the above is extremely significant to us as our machines never stop from a punctured tyre, saving costly down time of the machines and allowing our operations to continue to the end of the shift. In short, using BEST T.P.S. has also helped us reduce our ongoing costs as now we can operate in a planned maintenance schedule not an ad-hoc manner. We have also noticed that this last year our tyres are not wearing as previously and our annual replacements have reduced.

V. Tsokani S.A.

We believe in taking preventative measures to maintain the operation of our fleet and safety of our employees and clients. We would normally expect double the return in value over cost of any preventative measure. We are very pleased and surprised with BEST as we have estimated that our savings compared to the cost of the sealant comes to ten times in value over cost. Naturally, we have already decided to install BEST in all our current vehicles, and all new purchases have BEST installed before we send them on site as part of our planned maintenance program

We highly appreciate our relationship with BEST Tyre Protection Sealant Int'l and we strongly recommend their new generation sealant.

Sincerely

Charalampos TSOKANIS
President and Managing Director
